DETAILED ACTION

Claims 1-42 are currently pending in this application.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-15, drawn to an isomaltosylglucosaccharide-forming enzyme, method of making said enzyme and method of using said enzyme.

Group II, claims 16-42, drawn to a cyclotetrasaccharide having the structure of cyclo{6)- α -D-glucopyranosyl-(1-3)- α -D-glucopyranosyl-(1-6)- α -D-glucopyranosyl-(1-3)- α -D-glucopyranosyl-(1-} and a method of making said cyclotetrasaccharide.

The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Pursuant to 37 C.F.R. 1.475 (d), the ISA/US considers that where multiple products and processes are claimed, the main invention shall consist of the first invention of the category first mentioned in the claims and the first recited invention of each of the other categories related thereto. Accordingly, the main invention (Group I) comprises the first-recited product, a polynucleotide encoding MCP-5, a vector, a host cell, a

Art Unit: 1652

method for producing MCP-5 and MCP-5 polypeptide. Further pursuant to 37 C.F.R. 1.475 (d), the ISA/US considers that any feature which the subsequently recited products and methods share with the main invention does not constitute a special technical feature within the meaning of PCT Rule 13.2 and that each of such products and methods accordingly defines a separate invention.

Species Election

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

α -isomaltosylglucosaccharide-forming enzymes with

- 1) SEQ ID NO:1,
- 2)SEQ ID NO:5,
- 3)SEQ ID NO:6,
- 4) SEQ ID NO:7,
- 5) SEQ ID NO:11,
- 6) SEQ ID NO:12,
- 7) SEQ ID NO:13,
- 8) SEQ ID NO:14,
- 9) SEQ ID NO:18.

Applicant is required, in reply to this action, to elect a single species (**i.e., a single SEQ ID NO**) to which the claims shall be restricted if no generic claim is finally held to be allowable.

Art Unit: 1652

The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner: Claims are drawn to the α -isomaltosylglucosaccharide-forming enzyme having different structures (i.e., amino acid sequences). The following claim(s) are generic: Claims 1-15.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: Claims are drawn to α -isomaltosylglucosaccharide-forming enzymes with different structure.

Applicant is advised that the reply to this requirement to be complete **must include an election of the invention** (i.e., a single group and a single species) to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 1652

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
